Python | C/C++ | Go | Javascript | SQL | Typescript | Flutter | Django | FastAPI | React | OOP | Clean Architecture | SOLID | Docker | AWS | Azure | Firebase | CI/CD

PERSONAL PROJECTS

Garagum - Product Design & Ordering Tool
(09/2023 - Present)

- Developed a web and mobile application that enables users to design custom products by adding logos, text, social media icons, and contact details. Users can **resize, move, and position objects**, and an **AI-powered** background remover automatically crops uploaded logos. The platform allows customers to **place orders directly** with businesses.
- **Live Preview & Customization** – Users can see real-time changes before ordering.
- **Integrated with multiple businesses** , improving their product customization workflow. **Businesses report high satisfaction** with the platform's ease of use and efficiency.
- **Technologies Used** : Flutter, Dart, Firebase, REST APIs, BLoC pattern, CI/CD, Python/Django, Docker.

EDUCATION

Computer Science and Applied Math
Magtymguly Turkmen State University

09/2013 - 06/2018 *Ashgabat, Turkmenistan*
