WORK EXPERIENCE

Senior Flutter developer
Scrumlaunch LLC

11/2022 - Present — *Los Angeles, USA (Remote)*

IT services for US start-ups

Achievements/Tasks

- Played a key role in designing and implementing project architecture, adhering to SOLID principles and clean code practices.
- Led the development of cross-platform mobile applications using Flutter, targeting both iOS, Android and Web platforms.
- Set up and managed CI/CD pipelines to automate build, test, and deployment processes, reducing time-to-market.

Flutter developer
Yashyl Ada ES

10/2020 - 11/2022 — *Ashgabat, Turkmenistan*

Software Development Studio

Achievements/Tasks

- Successfully launched and maintained applications in both the App Store and Play Market, achieving high user ratings.
- Integrated Firebase services, including Firestore, Authentication, Analytics, and Cloud Messaging, to enhance app functionality.
- Leveraged BLoC and Provider for efficient state management and code scalability.

Flutter developer
Sanly Galam

07/2019 - 10/2020 — *Ashgabat, Turkmenistan*

Software Development Studio

Achievements/Tasks

- Utilized Flutter's main UI libraries to create responsive and intuitive user interfaces.
- Developed and maintained multiple Flutter applications with complex UI and asynchronous programming using Dart.
- Contributed to the development of feature-rich Flutter applications, focusing on user experience and performance.

VOLUNTEER EXPERIENCE

Competitive Programming Tutor
1st Specialized High School

05/2017 - 05/2018 — *Ashgabat, Turkmenistan*

Tasks/Achievements

- Planned lessons for small groups of 4-6 students, providing 5 hours per week targeted informatics tutoring

SKILLS

Dart | Flutter | Firebase | CI/CD | Git | Clean Architecture | SOLID | OOP | REST | Python/Djangp | C/C++ | JavaScript | Go | Docker | SQL | NoSQL | PostgreSQL

PROJECTS

Ýoda Restoran (09/2021 - Present)

- An online platform connecting restaurants and cafes with a delivery service. Features include a user-friendly interface, minimalistic design, fast and easy ordering, and step-by-step order tracking.
- Successfully published the application on the App Store and Play Market, achieving 10,000+ downloads on each platform and processed 100+ orders daily.
- Enabled step-by-step order tracking, improving transparency and customer satisfaction, leading to a 90% reduction in customer inquiries.
- **Technologies Used** : Flutter, Dart, Firebase, REST APIs, BLoC pattern, CI/CD, Python/Django, Docker.

Ýoda Jobs (05/2023 - Present)

- A job search platform designed to help users find jobs they love with a simple, easy-to-use, and effective application.
- Added advanced filtering options by salary, experience level, and other criteria, enhancing user satisfaction by 30%.
- Integrated Firebase for real-time data synchronization and notifications, ensuring users receive timely updates on job postings.
- **Technologies Used** : Flutter, Dart, Firebase, REST APIs, BLoC pattern, CI/CD, Python/Django, Docker, PostgreSQL.
